

# SPIROMETRY

## INTERPRETATION WORKSHOP

This half day workshop provides an overview of the interpretation of spirometry. The practical skills required to produce technically acceptable results will be briefly covered. It is ideal for all Medical Practitioners who interpret spirometry and meets the requirements of NSW Coal Services Order 43.

### COURSE OBJECTIVES

To provide the essential skills & knowledge required for Medical Practitioners to interpret spirometry

- Ensuring tests are performed to the international quality guidelines for testing (acceptability & repeatability criteria)
- Identifying quality & meaningful spirometry results
- Interpreting the results
- Longitudinal monitoring
- Referral pathways

### UPON COMPLETION, PARTICIPANTS WILL BE ABLE TO:

- Understand the concepts, indications & contraindications for spirometry
- Understand the international quality guidelines
- Identify poor quality results
- Understand and oversee the requirements for QA processes
- Apply an evidence based approach to interpret spirometry results
